

Coffeebot Papercraft

1. Cut out all the pieces of Coffeebot.

2. Cut along white line on Coffeebot's body. Roll Coffeebot's body into a cylinder. Fold the end (that says fold) and glue along edge. Glue fold to other end of body. Let dry.

3. Fold edges of Coffeebot's legs. Place a dab of glue on the word "fold." Attach to the bottom inside of Coffeebot's body. The word "fold" should not be seen.

4. Glue the fold section of the feet to the legs. Dab glue on the word "fold" on the feet, and attach to bottom of legs. The word "fold" should not be seen again here.

5. Glue arms to body (where it says "Arm").

6. Put a dab of glue on each tab on the "Top" of Coffeebot. Adhere each tab to the top of Coffeebot's body.

7. Fold the visor's edges EXCEPT for the tab that says "Insert into white line!" Insert this tab into the cut line in Coffeebot's forehead.

8. Let dry! Congrats you have your own Coffeebot!

9. Watch Coffeebot episodes with your Coffeebot at <https://www.youtube.com/user/coffeebotonline> and share with us at eric@coffeebotstudios.com
